

Reactive Versus Proactive Home Security

If during the middle of the night you are awakened by either a strange noise outside of your residence or an unexpected knock at your front door, would you rather be:

1. **Reactive** by looking through a peephole in your front door (or worst opening the door) to see if you can see anything suspicious or threatening?

— or —

2. **Proactive** by going to any computer, tablet, or smartphone in your home, and instantly viewing:
 - live pictures of the complete exterior of residence home, and/or;
 - recorded videos of everything suspicious that was recorded by your surveillance cameras during the past few minutes (or past few hours)?

24x7 Security Shield cameras can help provide a complete security shield around your home:

Surveillance Camera Control Computer

Surveillance camera views include:

1. Front entry.
2. Garage area.
3. Patio and swimming pool areas.
4. Side of area of residence.

Our 24x7 Security Shield© system will enable you to:

- Improve protection against home invasions by seeing who is at any door before opening it, or see who entered (or attempted to enter) residence while you were away.
- Verify that children arrived safely from school, do not invite friends over while you are away, or do not venture into restricted areas such as the swimming pool.
- Create schedule for daily or weekly recording for each surveillance camera.
- View all surveillance cameras across the Internet to:
 - ◇ Check on home while on vacation or out of town on business.
 - ◇ Monitor vacation homes or vacant property.
 - ◇ Check on elderly or disabled relatives living alone.
- Use existing Internet broadband network.
- Utilize your existing computers, tablets, and smartphones to monitor and control your cameras.
- Receive instant motion-detected alarms via Email from any 24x7 Security Shield camera on:
 - ◇ Any PCs attached to the Internet.
 - ◇ iPads, tablets, iPhones, and other smartphones.
- Add additional surveillance cameras or to easily move existing cameras to other locations.

A 24x7 Security Shield system is one of the best crime deterrent/prevention mechanism available.

“Proactive Surveillance Security Shield for Your Family and Your Home!”

A 24x7 Security Shield® residential surveillance camera system is one of the most effective crime prevention tools available to homeowners. This surveillance camera system is based on wireless microprocessor-based technology, and is inexpensive, easy to install, and highly reliable. Although these new surveillance cameras are based on technology that is radically different and less expensive than the Close-Circuit Television (CCTV) video

cameras currently used in most top-of-the-line commercial surveillance systems, they provide comparable (and sometime superior) surveillance features such as high-resolution images, integrated motion detection, comprehensive capture/archiving capabilities, PTZ, night-vision capability, and Email alarm notifications that can be sent to selected mobile phones and PDAs. These “intelligent” surveillance cameras include support the latest Wi-Fi security standards, and can easily be integrated into your existing broadband network.

Benefits of the 24x7 Security Shield® surveillance camera systems:

- Supports up to sixteen interior and/or exterior microprocessor-based surveillance cameras.
- Supports all major Wi-Fi security standards.
- Includes motion detection that can monitor a complete surveillance area or multiple “hot spot” within a given surveillance area.
- Supports a variety of advanced surveillance camera features including pan/tilt/zoom (PTZ), night-vision, and 2-way audio.
- Sends surveillance videos and Email alerts to Internet-connected PCs, iPads, and iPhones.
- Support option security equipment such as all-weather enclosures for exterior mounting and motion-detection lighting.
- Can be integrated into your existing home automation or home alarm system.

Do-It-Yourself (DIY) Installation

We offer two DIY installation options:

- You can purchase your own camera system and we will install it using all required installation hardware, such as all-weather camera enclosures, heavy duty mount brackets, and additional electrical cable.
- Alternatively, we can purchase a camera system that meets your business requirement and pre-install it and configure it in our surveillance camera testing environment. After camera system is fully tested, we will send it to you along with a installation CD with easy-to-follow, step-by-step installation instructions.

We in either case, we will provide free technical support via telephone or Email for one full year.
